Annual Scientific Meeting

3 and 4 February 2019
Parkroyal Hotel – Melbourne Airport, Melbourne, Australia

IMMUNISATION COALITION

ABOUT THE IMMUNISATION COALITION

The Immunisation Coalition (IC) consists of medical and scientific specialists from around Australia and New Zealand with an interest in vaccine preventable diseases. The IC evolved out of the Influenza Specialist Group (ISG), which first appeared in 1992 with influenza and other infectious respiratory diseases as its primary focus.

VISION

The Immunisation Coalition will improve the protection of all Australians against infectious diseases by advocacy for immunisation.

MISSION

- To create public awareness regarding the importance of immunisation by providing educational materials and communication programs.
- To co-operate with key Australian professional bodies, consumer advocacy groups and the Australian, State and Territory Governments in their educational activities focused on immunisation to bring information to Australian healthcare professionals and the public.
- To work with consumers, health professionals and organisations with an interest in immunisation, ensuring that the information provided to consumers through our website and other communication channels is current, easily understood and scientifically informed.

ISG ANNUAL SCIENTIFIC MEETING

Each year, the IC commences its program of activities with the ISG Annual Scientific Meeting, held in Melbourne at the beginning of February. Attendees include members of the scientific and medical community, government health officials, pharmaceutical industry representatives, academics, and delegates from other health related NGOs.

SPONSORSHIP & SUPPORT

The IC is able to carry out its important work thanks to the generosity of its sponsors and in-kind supporters. Regardless of the source of sponsorship or support, full control over all of the IC's activities and published materials is ensured through its Board of Directors.

We would like to acknowledge the support of sponsors for this event:
